

AIRNIVOL<sup>®</sup>

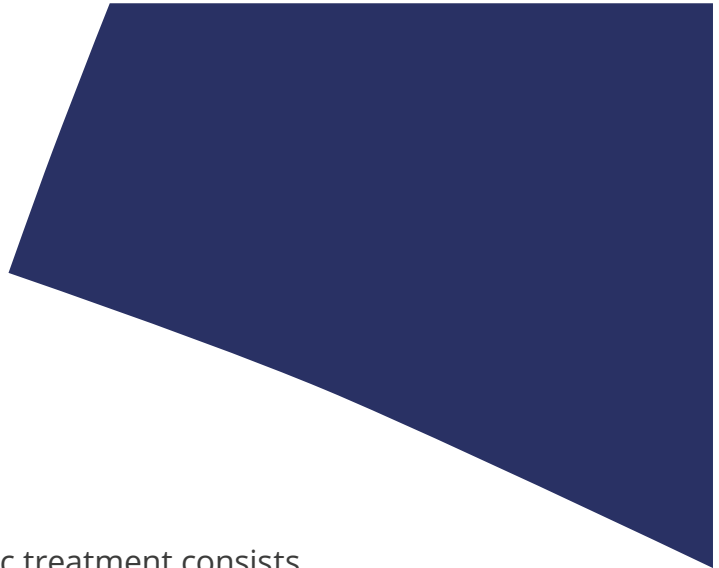

The orthodontic aligner

Free your **smile**

**AirNivol is the invisible  
orthodontic aligner,**  
custom made for you.  
With AirNivol you will  
have the smile you have  
always desired!

**EFFECTIVE. COMFORTABLE. SUITABLE.**

## **EFFECTIVE**

The AirNivol orthodontic treatment consists in a series of invisible and removable aligners, which have to be replaced approximately every two weeks. The aligners generate movements on the teeth, aligning them gradually. From the very first weeks you will notice the effectiveness of the treatment on your smile.

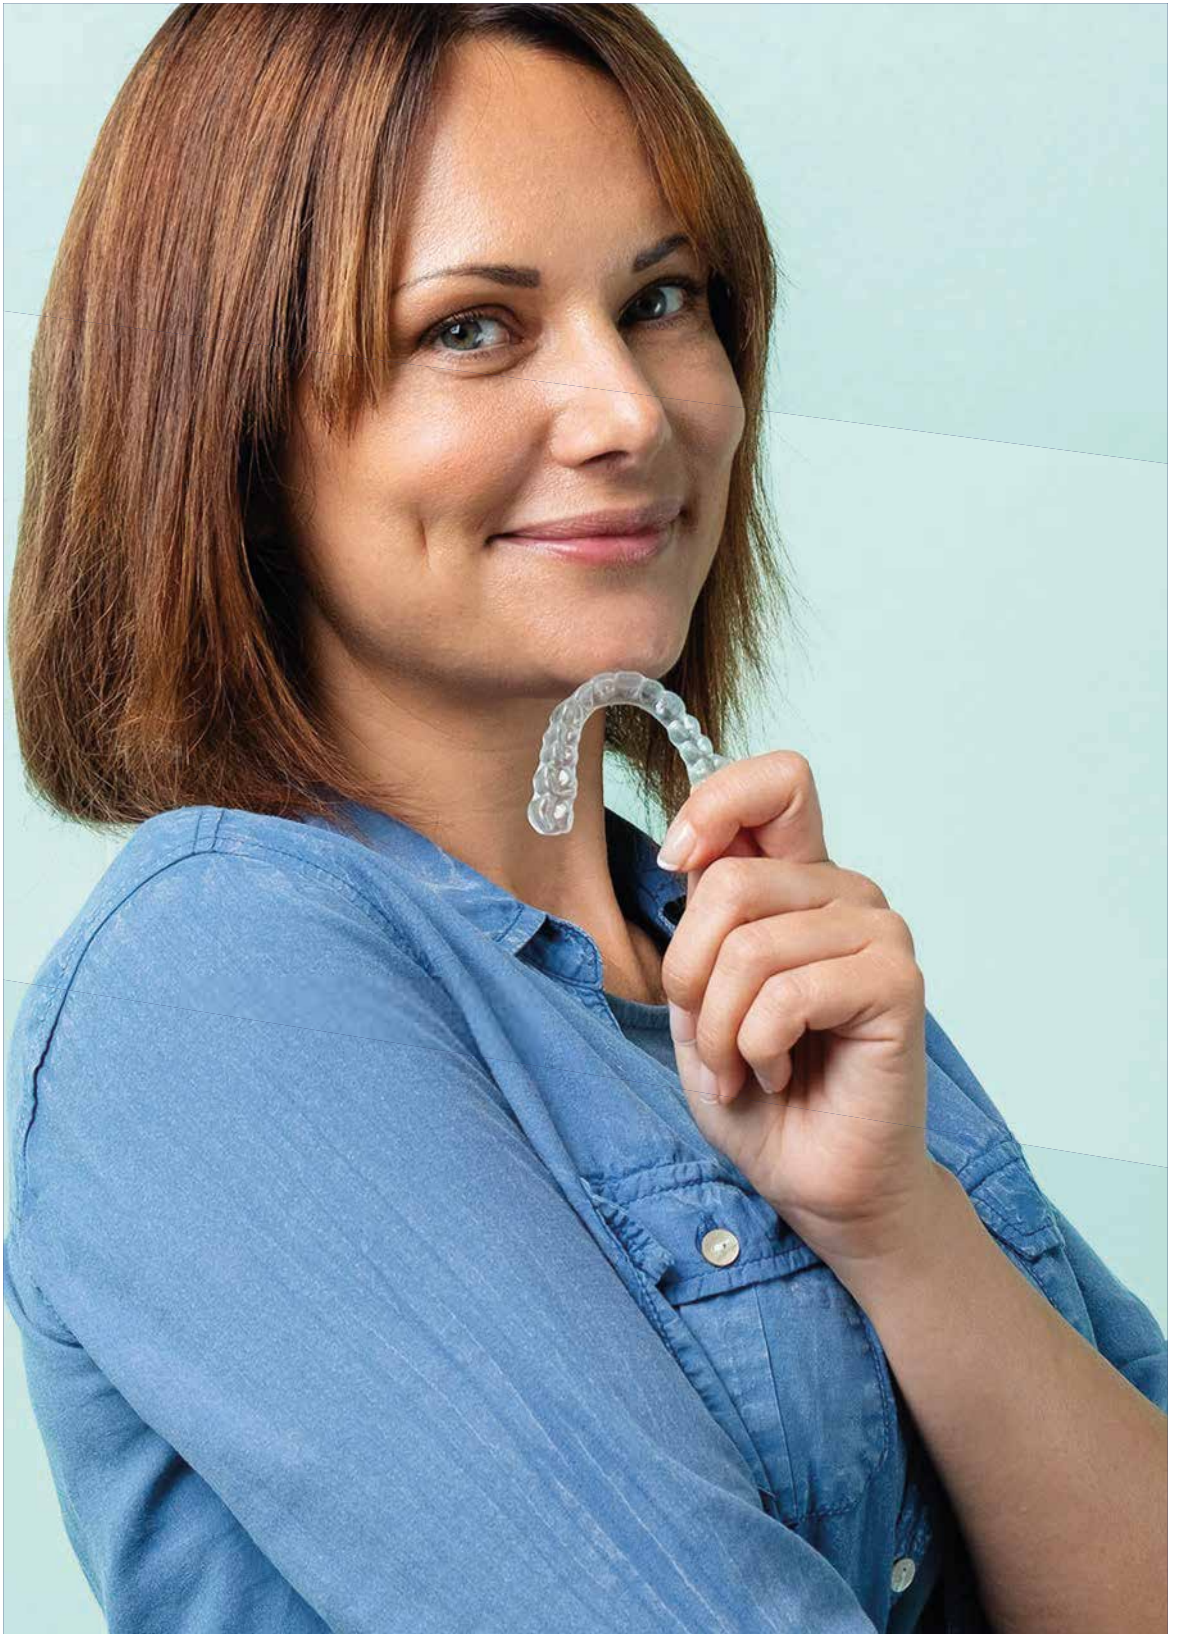

## **COMFORTABLE**

The aligners are made of a **transparent** biocompatible material. Every aligner is **custom-refined individually** in order not to irritate gums and cheeks.

## **SUITABLE FOR ANY SITUATION**

At work, at school, when you play sports or while sleeping: **AirNivol** aligners are completely compatible with any activity!

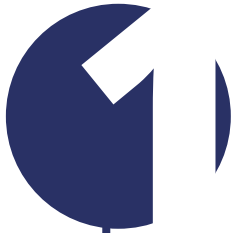

# WHY AIRNIVOL

- Because it doesn't change your daily habits
- Because you don't notice it. Its finishing **makes the aligners truly invisible**, compared to other brands of aligners that are shiny and reflective.
- Because the results are 100% **ensured!**

**Research and technology**  
to give you a wonderful  
smile!

Ask your dentist for more information!

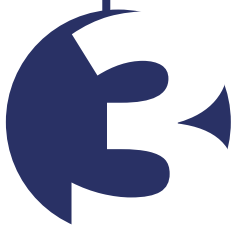

# HOW IT WORKS

**PLAN A VISIT:** Choose an AirNivol certified dentist and fix a visit.

**AIRCHECK:** After receiving the impressions and all the documentation relating to your dental arch, the AirNivol team will produce an AirCheck, a 3D treatment plan that will show you the evolution of your smile step-by-step.

**ALIGNERS' PRODUCTION:** When the dentist approves the AirCheck, AirNivol will start the production of your set of orthodontic aligners. As soon as it is ready you can pick it up at your dentist and begin the treatment.

**DURING THE TREATMENT:** Each aligner of your set must be worn for about two weeks and for at least 22 hours a day. During this time the teeth will gradually move in accordance with the plan. Through the appointments scheduled with your dentist you can monitor the treatment progress and the results of the treatment.

**END OF THE TREATMENT:** Once you have worn all the aligners, you will finally be able to show off your new smile. For a certain period of time you will need to wear a retainer, which will prevent any relapses.
